

Medicare Part B Preferred drug list — Aetna Medicare Advantage plans that offer prescription drug coverage (MAPD)

Some medically administered Part B drugs may have additional requirements or limits on coverage. These requirements and limits may include step therapy, where Aetna requires you to first try certain preferred drugs to treat your medical condition before covering another non-preferred drug for that condition.

For example, if Drug A and Drug B both treat your medical condition, Aetna may prefer Drug A, and require you to try it first. If Drug A does not work for you, Aetna will then cover Drug B. The listed preferred products should be used first. An exception process is in place for specific circumstances that may warrant a need for a non-preferred product.

Drug classes with preferred products are listed below.

To find out more, go to aetna.com. You can also call us using the number on your ID card.

Drug Class	Non-Preferred Product(s)	Preferred Product(s)
<i>Bone Resorption Inhibitors</i>	Xgeva	Pamidronate zoledronic acid
