

# Quality when it counts most Exchange Institutes of Excellence<sup>®</sup> transplant hospitals

Sometimes the best, life-saving option may be an organ or bone marrow/stem cell transplant. These operations require a special degree of skill and care. So it's important to look for hospitals known for quality of care. We've simplified the process.

As a member, you have a special network of hospitals that specialize in organ and bone marrow/stem cell transplants. We call these hospitals our Exchange - Institutes of Excellence<sup>®</sup> (Exchange IOE for short). They participate in the network only for the type of transplant listed in this directory.

To help you with this, Aetna has nurses and coordinators dedicated to you under a program called the National Medical Excellence Program<sup>®</sup> (NME for short). This staff will work with you and your providers throughout your transplant care.

If your plan has more than one level of preferred benefits, it is especially important that you coordinate your care through our NME nurses and coordinators.

You must use one of these hospitals to be covered for transplant services including:

- Evaluation
- Transplant
- Follow-up care

You need preauthorization – or preapproval – before we'll cover the services. If a hospital isn't part of the Exchange IOE network, it's considered nonparticipating or nonpreferred for transplant-related services. This is true even if that hospital participates for other types of services.

Exchange IOE requirements were created by working with experts on these health conditions. You can review these requirements at: <https://www.aetna.com/content/dam/aetna/pdfs/aetna.com/healthcare-professionals/documents/forms/Aetna-Institutes-of-Excellence.pdf>
