# Aetna® and CVS Health®
Integrated Value

1 Care manager support
With a simple phone call, our care managers are available to help educate and support you in your health journey. Have an upcoming doctor's appointment? We can help prepare you for the visit and make the most of it. Recently discharged from the hospital? Our in-store pharmacists can help engage eligible members with their care managers.

2 Personalized text messages
We encourage you with important health reminders, like to get your flu shot.

3 In-network labs and imaging centers
We can point you to local in-network labs for blood tests or to imaging centers for X-rays and MRIs.

4 MinuteClinic® Building
The Transform Diabetes Care® program, offered by Aetna and CVS Caremark®, has an integrated care offering to connect you to MinuteClinic services. MinuteClinic locations offer routine care services with convenient hours on weekends and evenings.

5 CVS® HealthHUB®
At CVS HealthHUB locations, you'll have expanded services like care concierges, who help members navigate their benefits and identify an in-network provider for specialty care.

6 The convenience of home
At some CVS locations®, you can speak to your pharmacist about signing up for an at-home colonoscopy screening kit.

7 Making a difference
With our "Rush to Brush" program, we may send you an oral health kit to help you have a safer surgical experience.

8 Convenient, affordable care
Annual preventive care is fully covered by Aetna if you choose in-network doctors. CVS clinicians and **Aetna Member Services** can help you find a primary care doctor in-network.
