The basics of prior authorization

What is prior authorization?

We may need more details before we can approve some care options and products. We call this prior authorization. Sometimes we may call it precertification or preapproval. These all mean the same thing. It's the process of confirming if your plan will cover a certain service or prescription drug.

Why it's needed

Some services or medicines cost more than others. And some have higher risks. Prior authorization lets us check to see if a treatment or medicine is necessary. This helps:

- Keep you safe
- Keep your costs down
- Keep our plans affordable

How it works

1. If your doctor thinks you need a service or medicine that requires prior authorization, they'll let us know. They do this by sending us a request online, over the phone, or via fax.

2. Once we have all the details we need, we'll review the request. (If we do not receive all the details needed, this may delay when we can begin the review.)

How it works (continued)

3.

We'll let you and your doctor know what we decide via letter. The review process can take up to two weeks.

a. **Medicare members:** If the request is for prescription drugs or services not yet received, Aetna must notify the member (and the prescribing physician or other prescriber involved, as appropriate) of our decision no later than 24 hours after receiving the physician's or other prescriber's supporting statement for **expedited** cases. Or no later than 72 hours after receiving the physician's or other prescriber's supporting statement for standard cases.

b. **Medicare members:** If the exception request involves reimbursement for prescription drugs or services already received, Aetna must notify the member (and the prescribing physician or other prescriber involved, as appropriate) of its decision (and make payment when appropriate) no later than 14 calendar days after receiving the request.

4.

If you don't agree with our decision, you can appeal it. The letter sent regarding the precertification decision will have the details on how to file an appeal request, along with the address to submit. You may also call the number on your member ID card and request an expedited appeal.

a. **Important note:** You have 60 days from the date of the letter to request an appeal.

Note: If you don't get the prior authorization you need, we may not pay for your treatment. This could mean you'll have to pay the bill yourself.

When you need it

This guide includes lists of the services and medicines that need prior authorization. In some plans, you might need prior authorization for the place where you get a service or medicine. We call this the site of service or site of care. You may also need prior authorization for:

- Transplants
- Certain types of genetic testing
- Hip and knee replacements
- Radiology or imaging services
- Out-of-network care
- Fertility services
- Cardiac catheterizations and rhythm implants
- Pain management
- Sleep studies
- Radiation therapy
- Peripheral arterial disease

- When you see an in-network doctor, they'll help you get the prior authorization you need. Check with your doctor to make sure you have it before you get care.
- If you need prior authorization for care out of our network, you'll need to get this approval yourself. You can check your plan documents to see if this applies to you. You can also ask your doctor for help.
- If you have a prescription drug plan from another insurer, it may have different guidelines than we have.

What else you may need

Does your plan make you choose a primary care physician (PCP)? If so, you may also need a referral for specialist care. This doesn't apply to all plans. You can check your plan documents to see if this applies to you.

A referral is not the same as prior authorization. If you need a referral, you should get this from your PCP before you get your prior authorization. You may need both for us to cover your care.

Questions?

We're here to help. You can call us at the number on your member ID card.

You can also check your plan documents to learn more about what you need for your plan.

Here are the prescription drugs that need prior authorization. We've divided them into two lists. The first one includes blood-clotting factors. The second one includes all other medicines that need prior authorization.

These lists show drugs you usually wouldn't give yourself. You may get them at a doctor's office. Or you may get them at a hospital without an overnight stay. These are not the same as the prescription drugs listed on your plan's formulary, or drug list.

Site of care does not apply to Medicare Part B Drugs.
