

Validate your NPPES data

Ensure your data is accurate.

Help us produce accurate provider directories for Medicare beneficiaries

The Centers for Medicare and Medicaid Services (CMS) suggests using the National Plan and Provider Enumeration System (NPPES) to review, update and attest to your NPPES data. We join with CMS to remind providers to keep their data up to date. Accurate provider directories help Medicare beneficiaries identify and locate providers and make health plan choices.

Click [here](#) for CMS' frequently asked questions on using NPPES data.

aetna.com

Aetna is the brand name used for products and services provided by one or more of the Aetna group of subsidiary companies, including Aetna Life Insurance Company and its affiliates (Aetna).
